PROFESSIONAL EXPERIENCE

Toronto District School Board

Audio Visual Technician – Etobicoke Collegiate Institute

Toronto, Ontario

2017 – 2020

- Set up and operated audiovisual equipment according to event requirements and specifications.
- Worked closely with event planners and customers to grasp their audiovisual requirements and preferences.
- Oversaw the inventory of audiovisual equipment, maintaining proper storage, upkeep, and organization to streamline deployment for upcoming events.
- Contributed to the coordination and implementation of event arrangements, encompassing equipment arrangement, cable organization, and venue configuration to enhance audience satisfaction.
- Performed comprehensive equipment inspections and troubleshooting to ensure seamless functionality and swift resolution of technical issues throughout events.
- Provided training and assistance to team members and clientele regarding the operation and fundamental problem-solving of AV equipment.

ACADEMIC EXPERIENCE

George Brown College, Centre for Arts, Design, and Information Technology

Travel Agency Project – Web Application Development

Toronto, Ontario

Winter 2024

- Integrated ASP.NET Core Identity into the Travel Application to manage users and roles effectively.
- Designed a secure authentication system to safeguard user accounts and personal data.
- Implemented access controls within the Travel Application based on user roles for enhanced security.
- Developed and integrated a custom filter in the Travel Application to improve logging functionality.
- Utilized advanced routing techniques to optimize user experience and maintainability in the Travel Application.
- Established a robust error handling framework within the Travel Application to handle runtime errors gracefully.
- Developed comprehensive unit tests for critical components of the Travel Application to ensure reliability.
- Enhanced interactivity and user experience by implementing AJAX in the Travel Application, enabling dynamic information loading without full page reloads.
- Deployed the Travel Agency Application to Microsoft Azure, transitioning from a web application to a live environment.
